Energy Savings: As a Service

What if your utility company came to you and offered to upgrade your lighting at no cost to you? And what if they told you that you could keep some of the savings as well? You would sign up for that in a heartbeat, right? It's free money after all.

Well this is exactly what ROI Energy Solutions can do for your facility. Through our Energy Savings: As a Service program, we can upgrade your lighting at no capital cost to you, while still allowing you to keep a share of the savings your lighting upgrade provides.

How it works

- We work to determine how much a lighting upgrade could save your facility
- You and our partner company enter into an "Energy Savings as a Service" shared savings agreement (usually 5-6 years).
- Your lighting upgrade is installed without any expense or investment
- All ongoing maintenance and repair is handled at no cost to you.
- You experience positive cash flow from day one, as there is no investment on your part.

Benefits of Our Energy Savings Program

- No Investment
- You save capital, making it available to help grow your business.
- No Debt
- Because this is considered a service, you don't have to report it on your balance sheet.
- You will be cash flow positive throughout the term of the agreement
- Freedom from responsibility of maintaining your new lighting

For details on how your company can benefit from the Cost Savings an LED lighting upgrade provides, call or email:
